Rationale

The spiritual, moral, social and cultural development of the child is recognised, by all stakeholders of member schools, as being of fundamental importance for the education of all children. It permeates all aspects of the curriculum, supports all areas of learning and contributes to our children's motivation to learn. It is recognised that such development will be most successful when the values and attitudes promoted by the staff provide a model of behaviour for the children. We believe that our SMSC development contributes towards the individual's appreciation of life's experiences and their relationships with other in communities around us.

The values and attitudes promoted by the staff influence the behaviour and attitudes within the school. The quality of relationships and the atmosphere within the school reflect an appreciation of their shared values.

Through classroom discussions we will give the children opportunities to:
